Bangladesh economy

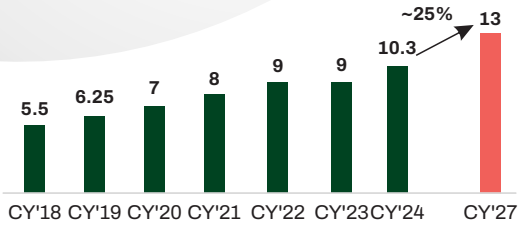

Bangladesh's economy is interlaced with potential, dynamism and resilience.

It was one of the fastest growing countries in the world, with an average growth rate of 7%. The country is now taking a futuristic approach through embracing sustainable solutions for industries and power generation.

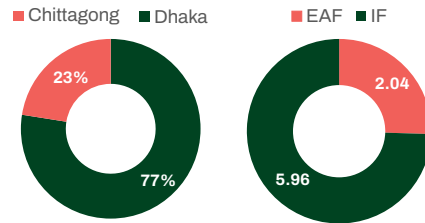

Steered by progression in infrastructure, construction & shipbuilding, the steel demand is expected to touch 15 mntpa by 2027. The cement industry, with its stable growth, is actively exploring opportunities to meet its clinker demand of 25 mtpa. While challenges for procurement of raw materials in the steel and cement industry necessitates imports, it also presents Bangladesh a bigger opportunity for regional collaboration. The 26k MW power sector is mostly dependent on Non renewables sources, though it is swiftly transitioning into clean and green energy.

About the conference

BigMint (formerly SteelMint) proposes to organise the 4th edition of our event- Bangladesh International Trade Summit - Sustainable Future.

Bangladesh, a strategically significant country for Asia-Pacific is emerging as a hotspot of growth through sustainable practices. The economic expansion is expected to encourage participation of more global companies and attract forex for the country.

The two-day conference shall bring together key stakeholders from steel, cement and power industries including industry leaders, policymakers, traders and investors. It shall provide a network for collaborative opportunities and a platform for discussion of trends and challenges in the market.

Why Bangladesh?

- Bangladesh has had a robust economic growth averaging nearly **7%** in the last decade
- With a population of **172** million, Bangladesh presents a significant opportunity, offering a vast consumer market and a substantial pool of manpower.
- Bangladesh, which is of high geographic and strategic importance, is witnessing greater investments and collaborations from countries like **China, Japan, India, Korea** among others.
- The Ready-Made Garment Industry (RMG) is increasingly embracing solar energy as a sustainable power solution to align with compliance norms from Europe.
- Bangladesh's steel consumption is estimated to reach 10.6 million tons by 2027
- It is the second largest destination for ship dismantling in the world and is coming up with four **Green ship recycling** yards.
- It is eyeing diversification into other key industries apart from its major **textile** industry.
- The per capita steel consumption of **45kgs** is predicted to shoot up amidst greater infrastructural growth
- It also imports raw materials for cement, majorly clinker and other materials such as **limestone, gypsum, fly ash** etc.

Topics of discussion

- **Bangladesh's Macro Economic Outlook** - Current capacity, policy & 2030 targets
- International availability of **Steel Raw Material Metallics** and source diversification
- **Flat Steel Market Dynamics** & import scenario
- Harnessing the **Potential of Green Ship Recycling**
- **Steel and Cement Demand** in Bangladesh's infrastructure growth
- **Cement Raw Material Procurement** & source diversification
- **Renewable Energy** as sustainable & secure power source
- Accessing the usage of **Nonrenewable Energy Sources** - Coal, gas, oil
- Technology and capex involved in **Renewable Energy Transition**
- **Regional Power Cooperation** - Bangladesh, India, Nepal

Tentative schedule

14-05-2024 | Tuesday

09:30 - 10:15

Inaugural ceremony & conference commencement

10:30 - 11:30

Bangladesh: Macroeconomic outlook - current policy climate & targets

- Economic recovery path for new government amid forex crisis
- Government push for infrastructural growth (Steel, cement and power)
- Electricity crisis and its impact on industrial sector
- Steps the central bank is taking to ease liquidity crisis

11:30 - 12:00

Networking tea break sponsored by

12:00 - 13:30

Main currents in ferrous scrap and metallics trade, availability concerns & options for import diversification

- EU waste shipment regulations, Japanese exports to face constraints. High-grade supplies to be affected sooner than expected?
- Diversification of import sources, grade concerns, impact on logistics and prices

13:30 - 14:30

Networking lunch

14:30 - 15:30

Bangladesh's power sector at a crossroads

- Capacity over 25,000 MW, consumption lower than 18,000 MW/year
- Heavy reliance on imports for electricity, LNG, coal, even NG (due to domestic depletion)
- Coal imports – a short-term or long-term solution?
- LPG imports – near-term outlook
- Where's the regulatory push for renewables?

15:30 - 16:00

Networking tea break sponsored by

16:00 - 17:00

Global flat steel market dynamics & perspectives on imports

- Easing rates and monetary policies to spur manufacturing, construction activities in 2024
- How is the global energy transition driving demand for flat steel products?
- Global HRC trade dynamics & outlook on Chinese exports
- Bangladesh's flat steel imports – key trends
- Renewable energy development in Bangladesh & flat steel growth potential
- Auto policy, domestic auto industry and potential growth in electric mobility

17:00 - 18:00

Demand for steel, cement in driving Bangladesh's infrastructure growth

- Current capacity and investment needs
- Policies needed to lure domestic, foreign investments
- Major Infrastructure projects in the pipeline
- Which sectors will propel steel and cement demand in the mid term?

18:30 - 19:30

Success story

19:30 - 22:00

Cocktail & networking dinner

09:30 - 10:30

**Fast-tracking Bangladesh's renewable energy growth:
Prospects & problems**

- How can govt. target of 2624 MW of renewable energy be achieved in the near term?
- Prospects of solar and bioenergy
- Investments in hydroelectric power at home and abroad – way forward
- Land acquisition hurdle to renewables development
- Technology & CAPEX requirements
- How to set the renewable tariff structure to compete with fossil-based power?

10:30 - 11:30

**Accessing conventional energy sources & prospects for
regional cooperation**

- Dwindling domestic gas reserves – the way forward
- Domestic coal mine developments & foreign investments
- Electricity and coal imports – emerging patterns of regional cooperation
- Strategies to replace costly fuel imports, enhancing domestic self-sufficiency

11:30 - 12:00

Networking tea break sponsored by

12:00 - 13:30

Harnessing the potential of green ship recycling

- Timeline for ship recyclers to ratify HongKong Convention
- 4 HKC-compliant yards in country – how many are in the pipeline?
- Cost hurdle in achieving HKC compliance – how will the domestic industry respond?
- Will the government boost the sector by paying for medical insurance of workers, easing taxes?
- Scrap generation potential from ship recycling – how are the domestic yards gearing up?

13:30 - 14:30

Networking lunch

14:30 - 15:30

Raw material procurement challenges & source diversification in cement sector

- Geopolitical impact on supply chains.
 - Analysing cost implications and optimising supply chains
 - Policies to boost sustainable procurement practices.
-

15:30 - 16:00

Networking tea break sponsored by

16:00 - 17:30

Next-Generation leadership: Shaping the future of cement, steel, and power industries

17:30 - 17:45

Conference closure & vote of thanks

Shaking off Covid lull, Bangladesh steel industry eyes global foothold

INDUSTRY - BANGLADESH
TBS REPORT
The Bangladesh steel industry looks to secure a foothold in the global market with the sector beginning to bounce back from pandemic-induced, but temporary, lull.

...overseas firms by 2022, speakers said at the 3rd Steel & Raw Material Conference, Emerging Bangladesh, held in Chattogram on Tuesday.

...the high price of steel and goods. Demand for steel is slightly down at the moment due to rising prices of everything," he said, adding, "We want to meet the domestic needs of the country and capture the world market. We are working towards that goal."

...the steel industry, says that the industry is now in a position to export steel to other countries. He said that the industry is now in a position to export steel to other countries.

THE BUSINESS STANDARD

Date - 7 June 2022

Ctg international steel conference in September

Ahead of the event, a three-member Indian delegation is coming to Bangladesh on 6 June

20th-21st Sep/2022
Bangladesh

3rd STEEL & RAW MATERIAL CONFERENCE
Emerging Bangladesh
SCRAP • DRI • HRC • TECHNOLOGY

The conference will focus on the quality of steel products, especially long and flat products, the security of steel raw materials and products, and the most successful and sustainable modern technologies.

A three-member delegation from India, led by Sanjay Agarwal, director of the National Group of India, is also coming to Bangladesh on 6 June. Agarwal will meet with all steel associations and various industrialists at the conference.

The conference will incorporate interactive panel discussions addressing various topics including the steel industry in Bangladesh, the future of the global steelmaking sector, new technologies, and government policies.

Foreign and local experts will speak in a number of special sessions on marketing policy, global raw material prices and ship recycling, especially the post-Banar Ukraine war trade, and more.

Well known local companies such as PHP Family, BSHM, GPHI Steel, A326 Group, Golden Steel, Tabish Steel, Anwar Steel, and Multi-Industry Steel will join the event.

Sufi Mohammed Mizanur Rahman, an Ekushey Padak-winning industrialist and chairman of PHP Family, will inaugurate the two-day conference. SteelMint Limited, a joint venture of India and Bangladesh, is going to organize the event.

Chattogram to host 3rd Int'l Steel Conference this September

Around 200 delegates from 25 countries will attend the conference at the Radisson Blu Chattogram Bay View hotel in the port city.

The 3rd International Steel and Raw Material Conference is going to be held in Chattogram on September 20-21, 2022. The conference will focus on the quality of steel products, especially long and flat products, the security of steel raw materials and products, and the most successful and sustainable modern technologies.
